

Job Title: Engineering Technician

A fast-growing company in the Commercial Vehicle sector is looking for an Engineering Technician to help develop our next generation of products.

Job Description: Engineering Technician with a passion for hands-on fabrication, instrumentation, testing, and development of mechanical and electrical systems.

About the Role: You will help distinguish our company with expertise, integrity, and professionalism to create products that exceed customer expectations. Among the responsibilities of the role are:

- Work with product design engineers to create prototype hardware (mechanical and electrical) using sheet metal, machining centers, 3D printing machines, assembly tools, and electrical wiring
- Work with product design engineers to improve product cost, quality, and reliability
- Installation and debugging of hardware and software on prototype vehicles
- Troubleshooting of functional issues including noise, vibration, electrical grounding, and EMI via use of accelerometers, strain gauges, and data acquisition equipment
- Operation of test equipment including set up, data acquisition and reporting.
- Maintenance of test equipment according to quality control plans
- Work with manufacturing team to ensure assembly feasibility

Qualifications:

- Mechanic or comparable certification required
- Associates Degree preferred
- Excellent verbal and written communication
- Proficient in MS Excel, MS Word, and MS Powerpoint
- Problem solver – adept at troubleshooting and resolving issues
- Detailed-orientated
- Experience working in Manufacturing industries preferred
- Knowledge and/or experience in the vehicle industry a plus.

Other Information:

- Medical, Dental, Vision, Life, and 401K
- Vacation and Sick Pay
