Job Description: Software Engineering Manager with a passion for product design and development and a proven track record of design, development, and launch of innovative and robust components and systems. Candidate is skilled at creating and translating product requirements into solutions, including application of expert knowledge of control systems, electrical & mechanical component and system best practices, as well as possess a history of delivering functionality, reliability, and technical innovation.

About the Role: You will help distinguish our company with expertise, integrity, and professionalism to create products that exceed customer expectations. Among the responsibilities of the role are:

- Manage a team of software engineers to ensure efficient and effective operations.
  - Design, development, and launch of control systems for vehicle propulsion, braking, steering, battery management, auxiliary hydraulic and pneumatic systems, and onboard telematics.
  - Continuous improvement including feature performance and customer satisfaction actions
  - Innovation and technology roadmap development
  - Working integrally with the broader engineering team
  - Hands on collaboration with Manufacturing and Procurement Team Members
  - Hands on collaboration with key suppliers
- 
- Qualifications:
  - BS EE, MS EE Preferred
  - Minimum 10 years in control system software development
  - Minimum 3 years in a software management role

- Excellent verbal and written communication
- Strong project management skills, with excellent follow-up skills
- Problem solver – adept at troubleshooting and resolving issues
- Detailed-orientated
- Strategic thinker
- Proficient in C or C++ software
- Proficient with Microsoft Office applications: Word, Excel, and Outlook.
- Experience working in Manufacturing and/or Distribution industries preferred.  
Knowledge and/or experience in the vehicle industry a plus.

Other Information:

- Medical, Dental, Vision, Life, and 401K
- Vacation and Sick Pay
